

# Professional Liability Insurance for Chemical Consultants

No matter how good you are at your job, all it takes is one mistake (or one disgruntled client) to expose you to a costly, time-intensive lawsuit. Could your livelihood withstand a protracted and expensive legal battle?

Professional Liability Insurance can help protect your career. This policy covers claims alleging errors, omissions, and/or negligence from your professional chemical consulting services by handling defense costs and potential settlements.

## Program Highlights

- Contingent Bodily Injury/Property Damage

Coverage for unintentional injury or property damage resulting from your chemical consulting services. Most professional liability plans exclude this feature.

- Privacy Breach Response Services

Coverage for resolution and mitigation costs resulting from theft, loss, or unauthorized disclosure of personal information or sensitive data.

- Dedicated Claims Counsel

Our program has dedicated claim attorneys who have been working with ACS for over a decade and are well-versed in handling claims against chemists.

- Worldwide Coverage

If a lawsuit is brought against you from either the United States or Canada, you'll be covered no matter where in the world you render services.

- Claims-Made Policy

Retroactive coverage for claims occurring during the policy period—even if you've changed jobs or are no longer insured.

- Optional Prior Acts Coverage

Coverage against claims from incidents that occurred before you were insured.

Additionally, if you provide independent consulting services outside of your full-time job, you may qualify for part-time coverage that includes:

- \$100,000 limit
- \$2,500 deductible
- Annual premiums starting at \$350\*
